PROJECTS

Animal_Cruelty_web | [github link](#)

August 2024 -

September

- webpage against cruelty interactive features were written in React and good vanilla CSS. We also used Tailwind, ShadCN and FramerMotion to provide a nice UI that ties everything together. We also provide some features to adopt pets from shelters and donate to prevent animal cruelty that **currently link to real animal-cruelty causes**.
- The plight of stray animals
- The realities behind animal consumption
- The hidden horrors of using animal skins in fashion.

Voice-Assistant | [github link](#)

June 2023 - June - 2023

- A smart and interactive Voice Assistant built using React.js, Tailwind CSS and Web Speech API. This project enables users to give voice commands and receive real-time response.
- Converts voice commands into text.
- Reads out responses using a natural voice.
- Handles commands instantly.

Sidcup-Family-Golf | [github link](#)

May 2023 - June 2023

- Created a clone of Sidcup Family Golf website using **HTML, CSS, JavaScript Locomotive Scroll**.
- Apply advanced animation with **GSAP (GreenSock Animation Platform)** and using gooey effect using **Shery.js**
- Demonstrated proficiency **Frontend development** and creating seamless user interfaces, leading to an **80% improvement in user satisfaction** through optimized design and interactive elements.
