

RAJ GUPTA

Frontend Developer | React | Next.js | TypeScript | +919410812659| [Email](#) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Frontend Developer focused on building fast, scalable web applications using React and Next.js, delivering clean, user-centric interfaces and optimized performance.

SKILLS

- Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, TypeScript, JavaScript (ES6+)
- Backend: Node.js, Express.js, MongoDB, REST APIs, Firebase (Auth, FireStore, Cloud Messaging)
- Tools: Git, GitHub, Postman, VS Code

EXPERIENCE

Frontend Developer | Digital Monger Feb 2026 - Present 2026 - Fulltime

- Built scalable and high-performance web applications using React.js, Next.js, TypeScript, and Tailwind CSS, ensuring clean architecture and maintainable code
- Component Architecture: Modularized 40+ React components, reduced redundancy by 28%
- Improved SEO and performance by implementing best practices and optimizing pages using Lighthouse, enhancing visibility and load speed
- Developed responsive and dynamic user interfaces using React.js, Next.js, and Tailwind CSS, Reduced component bundle size by 35% and improved page load time from 3.2s to 1.8s by implementing code splitting and lazy loading with Nextjs
- Integrated REST APIs and collaborated with cross-functional teams to deliver responsive, user-centric, and production-ready features

Frontend Developer | Awwaltech Oct 2025 - Dec 2025 - Intern

- Delivered features: Built 6 features on-time with zero missed deadlines
- Worked on **minor backend tasks** using **Node.js and Express.js**, contributing to bug fixes and API testing.
- Team Collaboration: Delivered 6 features on-time with CTO and product team
- Participated in **code reviews, testing, and deployment**, ensuring high performance and clean code standards.

PROJECTS

Tasskr- AI Task Management System - [Live Demo](#)

- Developed a full-stack AI-powered task management platform using Node.js, MongoDB, and modern frontend technologies, enabling scalable and real-time task workflows.
- Built an interactive and responsive frontend with focus on productivity UX, including **real-time updates**, smooth state transitions, and intuitive task management flows.
- Integrated OpenAI-powered **AI features including AI Chatbot, AI Planner, task suggestions**, and insights, enhancing user productivity and engagement.
- Implemented real-time collaboration and team chat using efficient data synchronization techniques, enabling seamless multi-user interaction.

LIVEBAZ – Real-Time Football Score & Analytics Platform - [Live Demo](#)

- Developed a full-stack real-time football score platform using Next.js (App Router), building both scalable backend logic and a highly interactive frontend.
- Engineered reusable component architecture and efficient state handling, **reducing re-renders** and improving frontend performance by **~30%**.
- Integrated third-party sports APIs to display **100+ live matches with real-time updates**, using caching and optimized fetching strategies.
- Implemented AI-powered match insights and dynamic dashboards, enhancing interactivity and increasing user engagement with real-time analytics.

FineBank – Digital Banking Web App - [Live Demo](#)

- A full-stack digital banking web application enabling users to manage accounts, track expenses, and perform secure **transactions in real-time**.
- **Frontend:** Built with Next.js and Tailwind CSS, ensuring a sleek, responsive, and user-friendly interface with smooth animations and intuitive navigation.
- **Backend:** Developed using Node.js and Express.js with MongoDB for secure data management and authentication using JWT.
- Implemented key features like user authentication, expense tracking, transaction history, and financial analytics dashboard.
