

RAJ GUPTA

Frontend Developer | React | Next.js | Bareilly | +919410812659| [Email](#)| [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Frontend Developer who builds production-style React and Next.js applications by treating UI as a system — not just screens — with scalable components, real authentication flows, and maintainable architecture.

SKILLS

- Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+)
- Backend: Node.js, Express.js, MongoDB, REST APIs, Firebase (Auth, Fire store, Cloud Messaging)
- Tools: Git, GitHub, Postman, VS Code

EXPERIENCE

Frontend Developer | **Aczeron** Sept 2024 - Dec 2024 - Remote

- Key Skills: React.js, Next.js, Node-js, Technical Documentation
- Designed and implemented authentication flows (sign-in/sign-up, authorization) and an admin dashboard using React.js and Next.js, improving overall user experience and security.
- Collaborated with cross-functional team members to build responsive and user-friendly UI components using React.js and Tailwind CSS.

Frontend Developer | **Awwaltech** June 2024 - Sept 2024 - Remote

- Developed **responsive and dynamic user interfaces** using **React.js, Next.js, and Tailwind CSS**, improving overall UI consistency and speed.
- Collaborated with the backend team to **integrate RESTful APIs** and handle authentication and data fetching efficiently.
- Worked on **minor backend tasks** using **Node.js and Express.js**, contributing to bug fixes and API testing.
- Improved component reusability and reduced code redundancy by modularizing the UI architecture.
- Coordinated with the **CTO and product team** to deliver multiple features within tight deadlines.
- Participated in **code reviews, testing, and deployment**, ensuring high performance and clean code standards.

PROJECTS

FineBank – Digital Banking Web App - [github](#) | [Live Demo](#)

- A full-stack digital banking web application enabling users to manage accounts, track expenses, and perform secure **transactions in real-time**.
- **Frontend:** Built with Next.js and Tailwind CSS, ensuring a sleek, responsive, and user-friendly interface with smooth animations and intuitive navigation.
- **Backend:** Developed using Node.js and Express.js with MongoDB for secure data management and authentication using JWT.
- Implemented key features like user authentication, expense tracking, transaction history, and financial analytics dashboard.

Clinexia – Healthcare Management Platform- [github](#) | [Live Demo](#)

- Built **Clinexia**, a healthcare management platform aimed at reducing manual clinic workload and improving patient handling efficiency.
- Enabled digital management of appointments and patient records through an intuitive web interface.
- Designed and implemented a scalable full-stack architecture with an integrated backend, enabling secure data management and seamless feature expansion.
- Streamlined clinic operations by digitizing core workflows, enhancing data accessibility, and reducing dependency on manual processes.

Voice-Assistant – Web-Based Voice Assistant - [github](#) | [Live Demo](#)

- A smart and interactive Voice Assistant built using **React.js, Tailwind CSS and Web Speech API**. This project enables users to give voice commands and **receive real-time responses**.
- Implemented speech-to-text and text-to-speech features for smooth, natural voice interactions with users.
- Optimized command handling and UI responsiveness to ensure fast execution and seamless user experience.
- Implemented **modular component architecture** in React, making the voice assistant easy to extend with new commands and features in the future.

EDUCATION

SSVGI (AKTU) Uttar Pradesh, India *B.Tech, IT* (2022 – 2026)
