SUMMARY

Frontend Engineer skilled in building scalable, high-performance web applications using React.js, Next.js, TypeScript, and Tailwind CSS. Focused on clean architecture, optimized performance, and responsive user centric interfaces

WORK EXPERIENCE

Feb 2026 - Present

Digital Monger

Frontend Developer

- Developed and maintained MERN web applications with scalable frontend architecture and API integration..
- Integrated REST APIs, Redis caching, and Dockerized environments while collaborating with teams to deliver production-ready features.
- Improved SEO and website performance using Lighthouse optimization techniques.

EDUCATION

2022 - 2026

SHRI SIDDHI VINAYAK GROUP OF INSTITUTIONS

Bachelor of Technology (Information Technology)

PROJECTS

Bare&Woven E-commerce

- Built a full-stack web application with modern frontend architecture, backend integration, and scalable API handling.
- Optimized application performance with reusable components, clean code structure, and fast-loading pages.

ParchiQ – Scan Track Done

- Built a smart clinic queue platform with live token tracking and real-time wait-time updates.
- Implemented AI-powered patient calling and automated notification features for smoother clinic operations.
- Improved patient experience and clinic efficiency through real-time queue automation.

TasskrAI Task Management System

- Built a full-stack AI-powered task management platform with AI insights, adaptive planning, and chatbot integration.
- Implemented task prioritization, rescheduling, and planning features on the frontend by coordinating user interactions with backend and AI services.

SKILLS

- Languages: JavaScript, TypeScript,
- Frameworks: Next.js, React, Node.js, Express.js, FastAPI.
- Databases: MySQL, MongoDB, PostgreSQL.
- Tools & Automation: Docker, Redis, Postman, API Automation
